Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6,030,632 to Sawan et al. Sawan discloses a liquid dispenser 1 with a nozzle 3 for dispensing sterile liquid 2. The device may be used to dispense sterile ocular solutions. The dispenser comprises a container 4 with a filter or substrate 6 that may be antimicrobial. See column 2, lines 1-30, column 6, lines 1-25. The filter may comprise a metallic or non-metallic material (such as a metal salt), and may take the form of a plurality of beads, a membrane, wool, cartridge, or a fibrous bundle. The antimicrobial agents may be applied and held to the substrate by means of vapor deposition, electroplating, coating, or chemical bonding (see column 3, generally). Sawan does not disclose a particular filter surface area to liquid volume ratio. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the ratio claimed by applicant, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. See MPEP 2144.05.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- a. US 5,897,782 Chatelin
 - i. Container and antimicrobial filter
- b. US 5,885,453 Chatelin
 - ii. Container and antimicrobial matrix
